CONSULTING SERVICE

It's All In Your Head

Whether you attribute it to "mind over matter," the power of positive thinking, or the placebo effect, our subconscious has an amazing ability to push us to achieve things we might otherwise think impossible.

Maybe it's the ability to push through the pain to finish the 26th mile of a marathon, or to overcome your fear of public speaking to give a keynote address on a topic of real importance to you. Or it might be as simple as willing yourself to forego that piece of cake so you don't sabotage your diet.

Ultimately, our subconscious can empower us to fight back: to fight fear, to fight pain, to fight illness or to fight temptation. That same subconscious power can be harnessed to pursue a job promotion or raise, or to improve your personal and business relationships.

Let me show you how the ancient practice of Feng Shui can help you tap into the power of your subconscious to achieve good health, happiness and prosperity in your life. **Contact me** today and let's get started.

The Spirit Talk Retreat that I'm co-hosting at Xinalani in April is **SOLD OUT!** If you can't join me in April, I hope that you will think about spending a few days this summer in Maine. Here is the schedule.
